

Ideation Phase	Define the Problem Statements
Date	03 NOVEMBER 2025
Team ID	NM2025TMID04420
Project Name	To Supply Leftover Food to Poor
Maximum Marks	2 Marks

Customer Problem Statement Template:

Many people go hungry every day, while large quantities of edible food from restaurants, weddings, hostels, and events are wasted. There is no proper system to collect and distribute this leftover food safely to the poor. This creates an imbalance in society between food wastage and hunger.

People and organizations need a reliable way to share surplus food without difficulty. A clear notification and volunteer coordination system would help collect food before it spoils and deliver it safely to the needy. This initiative will reduce food waste, hunger, and promote social responsibility.

Problem & Solution Table:

Problem	Description	Solution
Food Wastage	Edible food from restaurants, hostels, and events is wasted daily.	Create a mobile app connecting donors, volunteers, and recipients.
Hunger	Poor people suffer due to lack of access to daily meals.	Distribute collected food through verified volunteers and community centers.
Coordination Issues	Donors and receivers lack a common communication platform.	Implement real-time notification and location-based alerts.
Food Safety	Collected food may spoil or be unsafe if delayed.	Introduce hygiene checks and fast volunteer pickup with temperature logs.
Awareness	Many people are unaware of how to donate leftover food.	Promote food donation through social media, workshops, and in-app donation guides.
